

ABSTRACT OF THE DISCLOSURE**5 METHOD AND APPARATUS FOR REMOVING INFORMATION FROM A
 SERVER**

10 A method and apparatus for managing confidential
information in a data processing system server. Information is received from a plurality of users. The information is stored on a server for many different uses and in many different files and databases. A request is received from the client to remove specific selected
15 information from the stored information for a user within the set of users, wherein the selected information is received in response to a transaction involving that user. In response to receiving the request, the selected information is removed from the stored information, thus
20 maintaining the privacy requests of that user.
